HTML Project: Personal Portfolio Webpage

Objective:

Create a simple personal portfolio webpage to showcase your skills, projects, and contact information.

Features:

1. **Header**: Include your name and a navigation menu.
2. **About Section**: Write a brief introduction about yourself.
3. **Projects Section**: Showcase 2-3 projects with descriptions and links.
4. **Skills Section**: List your skills (e.g., HTML, CSS, JavaScript).
5. **Contact Section**: Provide a contact form for visitors to reach you.
6. **Footer**: Include links to your social media profiles.

Steps to Develop:

1. **Create the HTML file**: Start with the above structure.
2. **Test Responsiveness**: Ensure it looks good on different devices.
3. **Deploy Your Site**: Use platforms like GitHub Pages or Netlify to publish your portfolio.

Additional Tips:

- Experiment with different layouts.
- Add images to your projects if applicable

Reception

a repository link and web link should be submitted for evaluation

Deadline

you have 5 days to complete this project starting from today.

the project should be submitted latest 19/01/24 at 23:59PM
